Group 39 // Northendome (Reclaiming Public Realm)

Northenden has limited sources of activity that appeals to all due to its outdated infrastructure and heavy traffic flow. We propose an intervention at the centre of Northenden's high street with a large, covered flexible space; Accompanied by a hub of entertainment, indoor market and community space which will draw people back into Northenden. The public space creates a place that the whole community can integrate and interact with each other through a varied range of possible activities. To increase public realm, we have introduced a new tramline to bring people and minimise car use.
