

# GROUP 3 // RE[ORGANISING] THE HIGHSTREET

Chorlton project aims to revive the buzzing yet disordered high street area by condensing, redesigning and re-landscaping Chorlton Cross shopping centre and the surrounding area. This project will create a lively and buzzing communal space for all the people living in the area through the new leisure centre, the multipurpose adaptable box park installation and market place, all of which will make the space more aesthetic and appealing. The idea of this intervention is to remove the singular directional flow and in turn create a hub of activity in the Chorlton high street

- 1. Stalls.
- 2. Seating.
- 3. Pedestrianise: > footfall.
- 4. Green spaces.
- 5. Signage towards plaza.
