

**'A LIVEABLE SPACE FOR THE COMMUNITIES OF THE PRESENT & FUTURE'**

**# NETWORK # DIVERSITY # ADAPTABILITY**

By extending upwards from the site and developing overarching networks of 'Sky-Bridges' and 'Pods' which create a utopian experience that makes shopping easier and more efficient. The pods allow for easy transportation of goods which overall refreshes the typical systems of high street stores. The user simply orders the goods which will be transported onto the sky bridge to be easily collected then consumed in the open space, with specially designed stalls and seating areas. This service will nurture existing independent businesses whilst bringing technology and modernity to the streets of Chorlton.
