

Group 10 // Chorlton Corner

Much of Chorlton's history was documented in the writings of Thomas Ellwood who wrote of the centre of the village around the village green. The suburban districts of Manchester now face challenges as they work towards developing age-friendly neighbourhoods that are inclusive and eco friendly. By incorporating a square that connects both high streets via a corner, it acts as an anchor bringing the neighbourhood together. The square will be a development of the existing market that will allow local businesses to grow and community events to create a more vibrant space for trade and tourism to materialise.
