

Group 22 // Connecting Harpurhey

Overall Harpurhey performs well as a district centre as it meets the basic needs of the local community, however the area struggles with problems such as crime, inadequate connections between areas and has a dated appearance.

By engaging in low-cost and quick to enact actions within this district centre we are able to use Harpurhey's strengths to enhance the area for the local community and encourage tourism.

These interventions within Harpurhey will ensure each of the busiest areas are connected together and will generally update the area, allowing Harpurhey re-brand and to move on from its negative perceptions.
