

Group 30 // Harpurhey Community Forest.

Our reimagined district centre has created a fully pedestrianised and sheltered high street that encourages a communal interaction across the high street. The existing street has a high usage but very little interaction between the groups of users on the street. By opening all of the shop fronts and creating shelter the inhabitants are encouraged to stop and talk to shopkeepers, maintaining personal connection, whilst still being able to shop on the high street as before. The shopkeepers are then encouraged to take ownership of the street and create a lively, vibrant and constantly developing scene environment that boosts the overall place assurance.
