

# Group 31 // Northern Enclosure

Northern ENCLOSURE breathes life back into Northenden by rethinking the high street as a highly public space, dedicated to providing human interaction and well-being that the convenience and low prices of online shopping can't provide. The project provides three key areas of different activity, [EAT-PLAY-LIVE], one at each end to encourage movement through the town and one at a key junction between. These spaces use contemporary alternatives to the traditional activities high streets once provided to encourage citizens back out onto the streets together. A pop up outdoor cinema, micro food stalls with multi-cultural choices and flexible spaces promoting health and relaxation have been developed to convert this once 'Northern Enclosure' into an open public environment.
