

Group 45 // Well-Being // Withington.

After reflecting as a group about how we could improve Withington high-street, we decided we wanted to focus on improving the well-being of its residents and visitors. Due to the Maggie Centre and Withington Community Hospital being an anchor to the town, we felt that this would promote healthy living and create a vibrant center in the town. To achieve this, we decided to increase the accessibility of the high-street by diverting traffic away. This helps to reduce pollution on the street as well as allowing for entertainment spaces, seating, and green spaces for the public to enjoy.
