

Group 48 // Withington High Street

Located between the vibrant student area of Fallowfield, and Didsbury, Manchester's most expensive suburb, Withington is comprised mostly of low-income housing and notably a lack of comparative identity. Our vision to establish Withington high street as both a cultural destination and a thoroughfare between the south Manchester suburbs comes in the form of an elevated cycle-highway, inspiring the community to take action to reclaim the high street below with street art and various installations. Gabled roofing is stripped back to create rooftop allotments to allow residents to practice permaculture, a method of self sufficiency through sustainable farming.
